GitHub: https://github.com/mariapetra

Passionate about self learning and development, I thrive when helping others and solving problems. I am seeking a role as a Developer to combine my professional skills in Business Analysis, Project Management, Implementations, and Technical Support and study completed in June 2022 as part of the She Codes Plus scholarship.

EDUCATION AND CERTIFICATIONS

Languages:	Javascript, Python, HTML, CSS
Frameworks:	Django Rest Framework, React
Other:	Visual Studio Code, Github, Jira
Completed Study:	She Codes Plus Coding Scholarship
	Scrimba Javascript Bootcamp
	BA Fine Arts, University of Reading, UK

PROJECTS

WinWall

https://shrouded-wave-23056.herokuapp.com

• Technologies used: DRF; React; Javascript; HTML; CSS; Heroku

• Group project with She Codes Plus - Our client requested a a website that would display sticky notes from the different She Codes events

• Presented MVP and product solution to meet the clients requirements

• Using project management skills we were able to plan, organise and successfully complete an online collaboration tool within 3 weeks, providing the organisers of SheCodes workshops and attendees a visual workspace to add digital sticky notes to WinWalls, using GitHub to collaborate on the development of the project

• Using QR codes attendees were able to post their feedback on a live WinWall that sat in their own collection of WinWalls either anonymously or with a user account

• Superusers were able to export the user and feedback data as a csv file

• Superusers could update user access to assign admin users to collections

Portfolio Project

https://mariapetra.github.io/

• Technologies used: CSS; HTML; and Javascript; and deployed to GitHub pages

- Online portfolio website using responsive design principles, semantic HTML and interactive features including light and dark mode and functional contact form with ReCaptcha codes to prevent spam; personal redirect page and 404 page
- Displays projects; a bio; a blog and a contact form

Python Weather App

https://github.com/mariapetra/weather-project-code

- Technologies used: <u>Python</u>
- Process csv files containing data about the weather, and convert them into meaningful text-based summaries
- Ran tests to ensure code was working correctly

Django News Project

https://afternoon-sierra-40497.herokuapp.com/news/

- Technologies used: <u>Django; Python; HTML; CSS; Heroku</u>
- Website that allows users to create news articles when signed in
- Users can edit profiles and delete and edit news stories
- Different auth levels including admin to delete and create categories, stories organised and can be viewed by category

Crowdfunding App

- Technologies used: <u>Django Rest Framework; React; HTML; CSS; Javascript; Heroku</u>
- Crowdfunding app called Queer Hero, where the LGBTQ+ community could support each other by providing their time for career advice and peer support
- Backend in DRF linked to frontend in React

<u>PROFESSIONAL EXPERIENCE</u>

BHP   May 2022 - Current

Business Analyst

- As an Agile Business Analyst I facilitated Scrum ceremonies
- Stakeholder engagement to gather requirements and plan work for the sprints considering the business plans and roadmaps
- Scope, write user stories, create wireframes and refine requirements for development work
- Writing documentation and user guides
- Monitoring support tickets, creating Jira tickets and Confluence pages
