	Scrimba Javascript Bootcamp
	BA Fine Arts, University of Reading, UK

PROJECTS

WinWall

https://shrouded-wave-23056.herokuapp.com

• Technologies used: DRF; React; Javascript; HTML; CSS; Deployed on Heroku

• Final group project with She Codes Plus

• Client requested an online solution for event feedback, presented MVP and product solution to meet the clients requirements

• Collaborated with team with the use of GitHub

• Online collaboration tool, providing organisers of SheCodes workshops and attendees a visual workspace to add digital sticky notes to WinWalls

• Digital win walls organised by event collection

• CSV export for user and sticky note data available to super users

• QR code functionality to take users to live event form to post their feedback

Portfolio Project

https://mariapetra.github.io/

• Technologies used: CSS; HTML; and Javascript; and deployed to GitHub pages

• Online portfolio website using responsive design principles, semantic HTML and interactive features including light and dark mode and functional contact form

Python Weather App

https://github.com/mariapetra/weather-project-code

• Technologies used: <u>Python</u>

• Process csv files containing data about the weather, and convert them into meaningful text-based summaries

• Ran tests to ensure code was working correctly

Django News Project

https://afternoon-sierra-40497.herokuapp.com/news/

• Technologies used: <u>Django; Python; HTML; CSS</u>

• create a website that allowed users to create and edit news articles.

• Different auth levels including admin to delete and create categories

Crowdfunding App

• Technologies used: <u>Django Rest Framework; React; HTML; CSS; Javascript</u>

• I created a crowdfunding app called Queer Hero, where the LGBTQ+ community could support each other by providing their time for career advice and peer support

• Backend in DRF linked to frontend in React

<u>PROFESSIONAL EXPERIENCE</u>

BHP   May 2022 - Current

Business Analyst

• As an Agile Business Analyst I facilitated Scrum ceremonies and was the first point of contact for the daily management of a team of software developers

• Stakeholder engagement to gather requirements and plan work for the sprints considering the business plans and roadmaps

• Scope, write user stories, create wireframes and refine requirements for development work

• Writing documentation and user guides

• Monitoring support tickets, creating Jira tickets and Confluence pages
